

CSIE30600/CSIEB0290 Database Systems

Shiow-yang Wu

Department of Computer Science and
Information Engineering
National Dong Hwa University

Course Objectives

- First course in database systems
- Cover the **fundamental concepts**
- Using **Database Management System (DBMS)**.
- Learning state-of-the-art **open source DBMS**
- Study the **underline implementation** of DBMS
- **Advanced topics:** Cloud DBs and NoSQL for Big Data (topics for Big Data Systems course)*
- **Advanced topics:** XML DB, OODB, mobile DB, multimedia DB, parallel/distributed DB ...

Course Information

- Instructor's Office: Eng Building C308
- Office Hours: Tue 17:00 - 18:00
- Phone Number: (03) 8693020
- Email Address: showyang@gms.ndhu.edu.tw
- Grading Policy: (may change if necessary)
 - Assignments 25%
 - Midterm 25%
 - Final Exam 25%
 - Term project 25%

Web Pages

- Course webpage:
<http://web.csie.ndhu.edu.tw/showyang/DB2019s/index.html>
- Not on “東華e學苑” !!
- Instructor's homepage:
<http://web.csie.ndhu.edu.tw/showyang>

Textbooks

- Ramez Elmasri and Shamkant B. Navathe.
Fundamentals of Database Systems, 7th Edition. Pearson, 2016. (<https://www.pearson.com/us/higher-education/program/Elmasri-Fundamentals-of-Database-Systems-7th-Edition/PGM189052.html>)
- Avi Silberschatz, Henry F. Korth and S. Sudarshan.
Database System Concepts, 7th Edition. McGraw-Hill, 2019. (<https://www.db-book.com/db7/>)
- Recommended but not required.

- Mark Lutz. *Learning Python, 5th Edition*. O'Reilly Media, 2013.
- David Beazley and Brian K. Jones. *Python Cookbook, 3rd edition*. O'Reilly Media, 2013.
- Luciano Ramalho. *Fluent Python*. O'Reilly Media, 2015.

On-line Resources

- Wikibooks, **Structured Query Language**.
(https://en.wikibooks.org/wiki/Structured_Query_Language) (SQL:2011)
- Wikibooks, **MySQL**.
(<https://en.wikibooks.org/wiki/MySQL>)
- Wikibooks, **PostgreSQL**
(<https://en.wikibooks.org/wiki/PostgreSQL>)

Individual Term Project

- An on-line database application (details will be announced in class)
- Use an open source DB as backend database
- Use browser or smart phone as user interface
- Can use any technique to connect the database.
- We will discuss PHP+MySQL and/or Python+PostgreSQL.
- Demonstration and report due date: June 28, 2019.

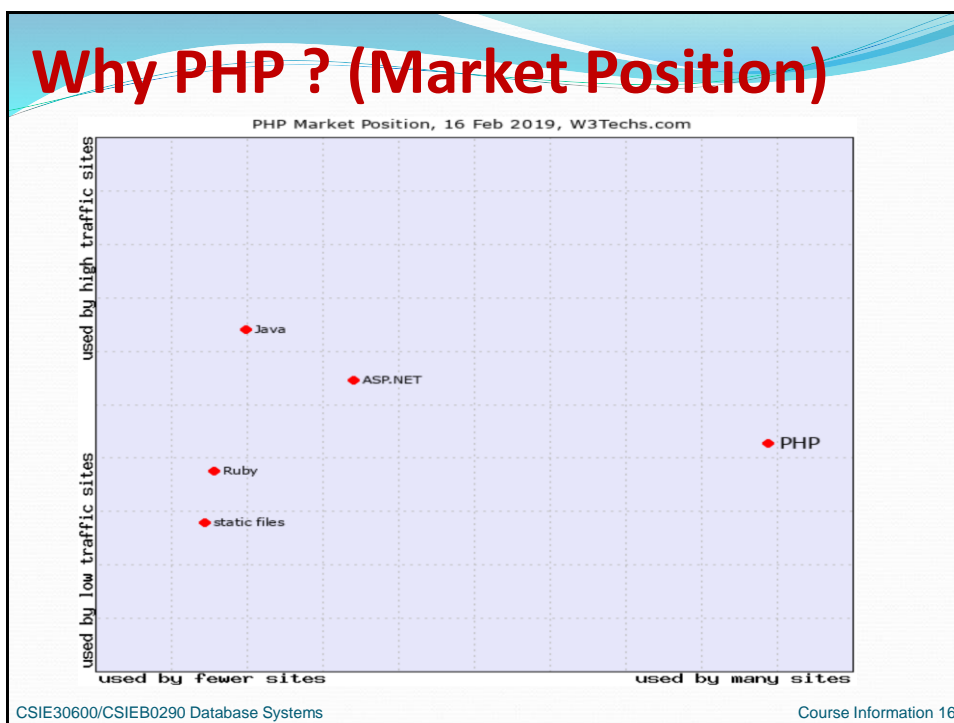

Why MySQL & PostgreSQL?

343 systems in ranking, February 2019

Rank			DBMS	Database Model	Score		
Feb 2019	Jan 2019	Feb 2018			Feb 2019	Jan 2019	Feb 2018
1.	1.	1.	Oracle +	Relational, Multi-model f	1264.02	-4.82	-39.26
2.	2.	2.	MySQL +	Relational, Multi-model f	1167.29	+13.02	-85.18
3.	3.	3.	Microsoft SQL Server +	Relational, Multi-model f	1040.05	-0.21	-81.98
4.	4.	4.	PostgreSQL +	Relational, Multi-model f	473.56	+7.45	+85.18
5.	5.	5.	MongoDB +	Document	395.09	+7.91	+58.67
6.	6.	6.	IBM Db2 +	Relational, Multi-model f	179.42	-0.43	-10.55
7.	7.	↑ 8.	Redis +	Key-value, Multi-model f	149.45	+0.43	+22.43
8.	8.	↑ 9.	Elasticsearch +	Search engine, Multi-model f	145.25	+1.81	+19.93

Course Information 18

Why Study Databases?

- Databases used to be *specialized applications*, now they are a *central component* in computing environments
 - Knowledge of database concepts is essential for computer scientists
 - Databases are *everywhere*, even when you don't see them
 - most activities involve *data*
 - Banking + credit cards: all transactions
 - Airlines: reservations, schedules
 - Universities: registration, grades
 - Telecommunications/networks
- (more on next slide)

CSIE30600/CSIEB0290 Database Systems

Course Information 19

Why Study Databases?

- Sales: customers, products, purchases
- Manufacturing: production, inventory, orders, supply chain
- Human resources: employee records, salaries, tax deductions
- Web sites: generated from databases; front-ends to databases
- Scientific research, e.g., studying the environment
- Your own data!
- Global data volume grows faster than ever! (next slide)
- Sky-high demand for Big data and NoSQL DB!
- *Data needs to be managed*

CSIE30600/CSIEB0290 Database Systems

Course Information 20

Global DataSphere

- **DataSphere**: the sum of ALL data around the world!
- Global DataSphere will grow to **175 ZB** by 2025, according to IDC.

Figure 1 - Annual Size of the Global Datasphere

CSIE30600/CSIEB0290 Database Systems

Course Information 21

Why Study Databases?

- **Because data is valuable:**
 - E.g., bank account records, tax records, student records, personal information ...
 - It must be **protected** - no matter what happens whether we have machine crashes, disk crashes, hurricanes/floods;
 - It also needs to be protected from **people**

CSIE30600/CSIEB0290 Database Systems

Course Information 22

Why Study Databases?

- **Because data is often structured:**
 - Bank account records all follow the same structure
 - We can exploit this regular structure
 - To retrieve data in useful ways (that is, we can use a *query language*)
 - To store data efficiently
- Dealing with **unstructured data** still needs database technologies.
- **Big data** needs database + new techniques

CSIE30600/CSIEB0290 Database Systems

Course Information 23

Why Study Databases?

- **Because the database field has made significant contributions to basic computer science:**
 - *Understand concepts and apply to different problems and different areas*
- **Because DBMS software is highly successful as a commercial technology** (Oracle, DB2, SQL Server...)
- **Because DB research is highly active and VERY interesting!**
 - Lots of opportunities to have practical impact

CSIE30600/CSIEB0290 Database Systems

Course Information 24

Syllabus

- Introduction
- Databases and database users
- Database system concepts and architecture
- Basic SQL (how to use a DB)
- ER/EER models and conceptual design
- Relational model and constraints
- Relational algebra and calculus**
- ER/EER to relational mapping
- Open source RDBMS(MySQL, PostgreSQL, ...)
- Web DB applications(with PHP, Python, ...)

CSIE30600/CSIEB0290 Database Systems

Course Information 25

Syllabus (cont.)

- Relational database design I – Functional dependencies and normalization
- Relational database design II – Further normalization and design algorithms
- Storage structure and indexing methods**
- Query processing and optimization
- Physical design and tuning**
- Transaction processing
- Concurrency control
- Recovery**

CSIE30600/CSIEB0290 Database Systems

Course Information 26

Syllabus (cont.)

- Object and object-relational databases**
- Semi-structured data and XML**
- Web database

Figure 1: O-O Database Structure

CSIE30600/CSIEB0290 Database Systems

Course Information 27

Syllabus (cont.)*

- Distributed and parallel databases
- Cloud computing and big data trends
- Big data systems and NoSQL databases
- Big data processing and analytics

© Can Stock Photo

CSIE30600/CSIEB0290 Database Systems

Course Information 28

Syllabus (Advanced Topics)*

- Database security
- Active databases
- Temporal and real-time databases
- Spatial databases
- Multimedia databases
- Deductive databases
- Information retrieval and Web search
- Data mining and data warehousing
- Mobile and pervasive data management
- Streaming data management/analytics

CSIE30600/CSIEB0290 Database Systems

Course Information 29

Accept the DB Challenges

- A very interesting and challenging class
- Be prepared for some theoretical discussion on the principles and algorithms.
- You must keep up with the pace.
- Ask questions if you miss the point.
- Design your own examples.
- Join us with the **DB challenges** !!!

CSIE30600/CSIEB0290 Database Systems
